## FINAL REJECTION

This office action is in response to the amendment and remarks filed 1/6/06. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action.

### ***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 2-21 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over either claims 1-20 of U.S. Patent No. 6,616,413. Although the conflicting claims are not identical, they are not patentably distinct from each other because the apparatus and method steps recited by the instant application are anticipated by the claims in the patent.

For instance: claim 2 of the instant application recites the following elements: *a power source, a pump, an electromagnet assembly, a controller and a sensor*. While, claims 1 and 2 of the patent recite the following elements: *a power source, a pump, an electromagnet assembly, a controller and a sensor*. Thus, the elements recited by claim 2 of the instant application are contained within "anticipated by" claims 1 and 2 of the patent.

Also, claims 9 and 16 of the instant application recite the following elements and/or method steps: *a power source, a pump, an electromagnet assembly, and driving the pump, controlling the power source, and sensing.* While, claims 8, 9, 15 and 16 of the patent recite the following elements and/or method steps: *a power source, a pump, an electromagnet assembly, and driving the pump, controlling the power source, and sensing.* Thus, the elements recited by claims 9 and 16 of the instant application are contained within “anticipated by” claims 8, 9, 15 and 16 of the patent.

The same analysis applies for the dependent claims.

### ***Conclusion***

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
